

Jennifer O. Peterson

Bronx, NY | (646) 342-1374 | jenniferbushpeterson@gmail.com | [\[LinkedIn\]](#) | [\[Github\]](#) | [\[Website\]](#)
Cybersecurity-focused Software Developer with experience deploying secure cloud architecture, full-stack applications, and automated backend infrastructure. Skilled in cloud risk mitigation, secure API design, and automation scripting. Adept at managing access controls and identity management to build scalable, secure tech solutions.

Education

CUNY Laguardia Community College | AAS, Programming & Software Development | GPA: 3.58

Expected Spring 2027

Certifications & Technical Training

- **Security & Cloud:** [Google Cloud Cybersecurity \(Spring 2026\)](#) | [Google Cybersecurity \(Coursera Spring 2025\)](#)
- **Systems & Automation:** [Google IT Automation with Python \(Coursera 2026\)](#) | [Linux Essentials \(Cisco 2026\)](#) | [Python Essentials 1 \(Cisco Spring 2026\)](#) | [Operating Systems Basics \(Cisco Fall 2025\)](#)
- **Career Prep:** [Intro to Technical Interview Prep \(CodePath, Fall 2025\)](#)

Technical Skills

Languages: JavaScript (ES6), Python, SQL

Cloud & Security: GCP, Security Command Center (SCC), IAM, Firewalls, IAP, JWT, RBAC

Backend & Databases: Node.js, Express.js, PostgreSQL, MySQL, Firebase

Frontend & Tools: React, HTML/CSS, Tailwind CSS, Material UI, Git

Projects

Roots and Recipes | [\[Repo\]](#)

- Full-stack recipe app using voice/image input for accessibility.
- Built authentication system and relational database structure
- Integrated AI features for voice and image-based input

Pokédex App | [\[App\]](#) | [\[Repo\]](#)

May 2026 – Present

Technologies: React, Tailwind CSS, JavaScript (ES6), REST APIs, Git

- Designed and deployed a responsive web application for searching, filtering, and performing side-by-side comparative analysis of Pokémon stats and performance metrics.
- Implemented optimized state management and interactive UI features to handle dynamic dataset comparisons across mobile and desktop devices.

Work Experience

Mentor Me Collective | Software Engineer & Cloud Intern

Remote | Summer 2026

- Maintained backend component documentation to improve team deployment velocity.
- Integrated software engineering design patterns with secure cloud infrastructure principles.

Speakhire | Software Engineer Intern

Hybrid | Spring 2026

- Built a full-stack Zoom-integrated Session Survey system using React, Node.js, and PostgreSQL to capture, store, and analyze feedback metrics for 100+ program participants.
- Implemented automated survey triggering during the final minutes of live sessions based on real-time attendance data, increasing survey compliance and reducing manual administrative tracking by 100%.
- Developed admin-facing dashboards and backend APIs to manage survey workflows, enforcing strict read-only authorization loops to secure sensitive user data across multiple program types.

United Nations (UNICC) | Cybersecurity Intern

Remote | Winter 2026

- Developed a Python automation tool to streamline secure data-handling scenario inputs/outputs for tabletop exercises.
- Validated data integrity across critical response playbooks, supporting international compliance standards.

Pursuit Fellowship | Full Stack Software Engineer

Long Island City, NY | 2022 – 2024

- Developed full-stack web applications using JavaScript, React, and PostgreSQL, applying test-driven development and collaborative problem solving.

IOS Staffing | Data Admin Analyst

New York, NY | 2021 – 2022

- Tracked repayments, maintained client databases, and managed departmental training compliance and budgets.

Whole Foods Market | Front End Sales Associate

New York, NY | 2012 – 2022

- Managed 100+ daily customer interactions, trained new staff, and supported store loss prevention efforts.

Clubs and Affiliations

- TTPR Program | Member

Spring 2026 – Present

- Phi Theta Kappa (PTK) | Member

Spring 2026 – Present

- President's Society | Ambassador

Fall 2026 – Spring 2027
